

Fine mist

M 300

High technology and output

SHROUD

FERRULE

SNAP

Developed from the M 150, this pump has all the quality features of that unit such as soft feel and fine spray, and is especially suitable for spraying and dispensing a variety of products that require higher output.

With a wide range of closures, crimp-on and snap-on versions, its ball-seal system guarantees good performance with hair care formulations containing resins.
